

# 6th Hamburg Harley Days

## June, 26-28 2009

For the 6th time, the Hamburg Harley Days take place in the city of Hamburg: 2009 some thousand bikers are expected with their engines as well as some hundred thousand visitors on the new event area all around the quay sheds in the duty-free port of Hamburg ("50er Schuppen"). From here, you have beautiful view of the Hamburg Port and the Hanseatic skyline. An additional party area is planned on the Reeperbahn in St. Pauli.

You can reach the event area by bus or ship shuttle within 5 minutes from Landungsbrücken. They will be running in a tight time schedule. Visitors will find a huge parking lot around the event area.

The „Dealer Mile“ will be enlarged by a „**Custom Area**“ . In the years before, the customers' exhibition had been added with international well known companies like OCC and West Cost Choppers and constantly extended – a trend which will be continued this year, too. Furthermore equipment dealers like Harley Davidson partners from all over Germany and Europe will present their products. Enough space for huge show-trucks and special exhibition areas is provided.

Some hundred thousand visitors are shown an authentic program, a wide range of small bike equipment and a special selected catering service. Along the **main street**, running beside the water edge of the harbor and through the event area, visitors can purchase interesting parts or admire the many different Harley-Davidson models. On the main stage, guests can listen to rock, country and blues music presented by stars coming from all over. A lot of party-points and big tents with different themes will entertain the fans of the biker scene in very special ways. Further program elements like the **demo rides**, the stunt-shows, the big **parade** on Sunday and the 120 custom bikes taking part in the **ride-in bike show** in the city centre of Hamburg will enjoy every visitor and tourist. The expert-jury and the number of participants have taken a big step forward in quality and experience.
